

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PREFACE

THIS book is one of a series, prepared by compiling the lists of words actually taught, during recent years, in the schools of six different cities of the United States. These lists have been edited in consultation with experienced teachers. The general plan incorporates a review of the drill words in the lessons of the preceding grade; daily advance lessons; the use of all the important words in suitable sentences; the memorizing of brief selections; the frequent reappearance in the sentences of the most important words; the syllabication of all spelling words; a final review list; and lessons upon abbreviations and the calendar months. The words selected are those which the children need to know perfectly.

The *International Dictionary* and the *Century Dictionary* have been used as the authorities for spelling and syllabication. In all language lessons, it is necessary to remember that syllabication and pronunciation do not always divide a word into the same phonic elements.

“ Now, what shall I send to the earth to-day ? ”

Said the great, round, golden sun.

“ Oh ! let us go down there to work and play,”

Said the sunbeams every one.

So down to the earth, in a shining crowd,

Went the merry, busy crew.

— EMILIE POULSSON.

I know not where God's islands lift

Their fronded palms in air ;

I only know I cannot drift

Beyond his love and care.

— JOHN GREENLEAF WHITTIER.

THIRD YEAR GRADE. PART II

There is beauty in the forest,
 When the trees are green and fair ;
There is beauty in the meadow,
 When wild flowers are in the air ;
There is beauty in the sunlight,
 And the soft blue dome above ;
Oh ! the world is full of beauty
 When the heart is full of love.

— W. L. SMITH.

The heights by great men reached and kept
 Were not attained by sudden flight ;
But they, while their companions slept,
 Were toiling upward in the night.

Tarr and McMurry's Geographies

COMMENTS

North Plainfield, N.J. — "I think it the best Geography that I have seen." — H. J. WIGHTMAN, *Superintendent*.

Boston, Mass. — "I have been teaching the subject in the Boston Normal School for over twenty years, and Book I is the book I have been looking for for the last ten years. It comes nearer to what I have been working for than anything in the geography line that I have yet seen. I congratulate you on the good work."

— MISS L. T. MOSES, *Normal School*.

Detroit, Mich. — "I am much pleased with it and have had enthusiastic praise for it from all the teachers to whom I have shown it. It seems to me to be scientific, artistic, and convenient to a marked degree. The maps are a perfect joy to any teacher who has been using the complicated affairs given in most books of the kind."

— AGNES MCRAE.

De Kalb, Ill. — "I have just finished examining the first book of Tarr and McMurry's Geographies. I have read the book with care from cover to cover. To say that I am pleased with it is expressing it mildly. It seems to me just what a geography should be. It is correctly conceived and admirably executed. The subject is approached from the right direction and is developed in the right proportions. And those maps—how could they be any better? Surely authors and publishers have achieved a triumph in textbook making. I shall watch with interest for the appearance of the other two volumes." — Professor EDWARD C. PAGE, *Northern Illinois State Normal School*.

Asbury Park, N.J. — "I do not hesitate at all to say that I think the Tarr and McMurry's Geography the best in the market."

— F. S. SHEPARD, *Superintendent of Schools*.

Ithaca, N.Y. — "I am immensely pleased with Tarr and McMurry's Geography." — CHARLES DE GARMO, *Professor of Pedagogy, Cornell University*.

A Short History of the United States

FOR GRAMMAR GRADES

By EDWARD CHANNING

Author of "A Student's History of the United States," etc.

Half leather. 12mo. 90 cents, net

COMMENTS

J. A. TUTTLE, Superintendent of Schools, Boothbay Harbor, Me.

"I am much pleased with its contents and arrangement. The essential are there in language the average child can understand. The convenient references to other books is an improvement the wide-awake teacher will appreciate."

LEWIS E. FUNNELL, Principal Elm Street School, Stamford, Conn.

"I am delighted with Channing's Short History. It is admirably adapted to the needs of the highest grammar grades. In this presentation of our country's history are combined the broad scholarship of the university professor and the skill of the grammar school teacher. Altogether it is an ideal text-book."

N. G. KINGSLEY, Principal Doyle-Avenue Grammar School, Providence, R.I.

"It is an admirable presentation of the origin and growth of our nation. From cover to cover it is made intensely interesting, not only by striking illustrations and complete maps, but by the arrangement of the text and the facts presented in a clear, logical manner. The references to other text-books in history is a commendable feature. I fully agree with the author's statement in the preface as to the best method of studying the history of our country."

G. H. KNOWLTON, Superintendent of Schools, Swansea, Seekonk, and Freetown, Mass.

"It is desirable on account of its brevity; its marginal references to other books is an excellent feature; the maps are good; and I like the use of chapters rather than sharply marked divisions by administrations."

COMMENTS

"The arrangement of the subject-matter is new and must be pleasing to the children, especially if they have used one of the elementary histories built on the common plan."

— CHARLES L. CLAY,
Superintendent of Schools, Harvard, Mass.

"By presenting centres of interest through picturesque and personal incidents, connected with the greater events of our country, you have certainly afforded our pupils an excellent opportunity to become familiar with its history."
